A M E R I C A COAST TO COAST™

The Old Dominion ... The Beehive State ... The Lone Star State ... official nicknames that merely hint at the richness and diversity found in the 50 states that make up the U.S.A. Now, with the EasyKey™ keyboard overlay, young geographers and historians can travel first-class to every state of the union to improve their knowledge of their country without ever leaving home!

AMERICA COAST-TO-COAST features five exciting, interactive computer activities which help users learn more about all 50 states. In *State Facts*, you select specific states to learn about, getting a quick review of names, locations, capitals, years of statehood, shapes, nicknames and selected industries. *State Quiz* is a computer-generated Q & A based on state facts. *Mystery State* asks you to identify states from a series of clues. *Across the USA* is an exciting, multiple skill-level, travel game in

which you use your knowledge of state locations to trek from one state to another. And *State Shoot* combines dexterity with learning as you try to bull's-eye a given state and then correctly identify it.

The EasyKey™ keyboard overlay included with the program is an integral part of **AMERICA COAST-TO-COAST**. Made of durable, flexible vinyl, the EasyKey fits snugly over the computer keyboard to actually become the program menu! It makes it possible for users to quickly select options and answer questions without ever having had any previous typing or computer experience!

AMERICA COAST-TO-COAST has been professionally developed and tested by educators and experts in computer-based learning. Presented in a lively style that entertains as it informs, **AMERICA COAST-TO-COAST** includes a comprehensive program guide that complements the computer activities, providing insight into American history and suggestions for further fun and study. And with the fast, easy access to the computer provided by the EasyKey, the whole family can now rediscover America!

Developed by Neosoft, Incorporated.

Founded by award-winning professionals in industrial design, computer graphics, educational game development and electronics, Neosoft has pioneered a new concept in computer interaction.
